

8317CTFP AXION®

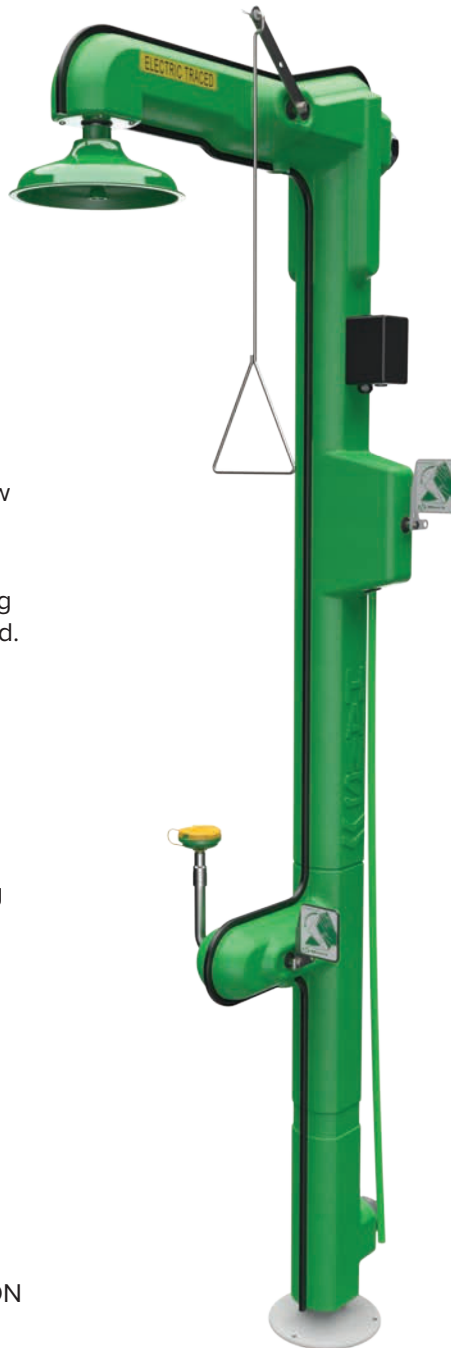

Freeze-protected combination safety shower

The cable-heated, freeze-protected combination safety shower *Haws* model 8317CTFP AXION ensures safety even in extreme weather conditions.

THE PERFECT CHOICE FOR YOU:

- **Cable-heated and insulated:** The safety shower is designed to withstand temperatures as low as -34°C , thanks to its cable-heated and insulated features.
- **AXION technology:** The safety shower uses AXION technology to provide reliable and compliant water flow in case of emergencies.
- **Ambient temperature thermostat:** The shower's ambient temperature thermostat ensures energy-saving and reliable freeze protection, giving you peace of mind.
- **Automatic bleed valve:** The bleed valve is a fail-safe feature that prevents the shower from freezing in the case of a power outage.
- **Self-draining eyewash:** prevents water from accumulating and thus freezing the eyewash
- **Additional body spray hose:** With the additional body spray hose, you have more rinsing possibilities, making the shower more versatile and practical.
- **High reliability:** The shower is manufactured in our factory in Switzerland, ensuring high reliability and quality.
- **Trouble-free and leak-free installation:** The shower's factory-tested electrical system and pressurized piping make installation easy and trouble-free.
- **Proven concept:** With over 1000 units installed, the *Haws* model 8317CTFP AXION is a proven concept that delivers reliable safety in numerous workplaces.
- **Compliant to international standards:** 8317CTFP AXION complies to the standards EN 15154 and ANSI Z358.1.

Choose the *Haws* model 8317CTFP AXION freeze protected combination safety shower for your workplace and enjoy peace of mind knowing that safety is guaranteed, even in extreme weather conditions.
