SPECIFICATIONS

Model 9082, bacteriostatic preservative for use in portable eyewash stations. One 236 ml bottle will preserve 18.9 to 75.7 L of potable water for up to four months. Four bottles per carton. This 'sterile' solution is in compliance with FDA regulations. Temperature storage requirements; store at 15-30° C.

APPLICATIONS

Specifically, this additive is designed to be used with any Haws portable eyewashes, overhead tank showers, and air-charged tempered shower systems where the integrity of the water needs to be preserved.
