

ESSENTIAL SAFETY SOLUTIONS

Top Eyewashes & Safety Showers
for Reliable Workplace Safety

AXION® TECHNOLOGY: THE GAME CHANGER

AXION Technology marks a major leap in the design and functionality of emergency showers and eyewash stations. This innovative technology offers injury reduction and increased victim comfort tackles key issues that can compromise the effectiveness of safety showers and eyewashes, ensuring reliable and consistent performance.

By enhancing workplace safety and compliance with international standards, AXION Technology ultimately improves first aid outcomes.

AXION Resolves Common Flow Issues

Our research of 3000 installations indicates that 77% of all tested emergency showers and eyewashes fail to provide proper first aid. With AXION, ensure complete flushing while mitigating your most common flow problems, including:

• LACK OF SIMULTANEOUS FLOW TO BOTH EYES

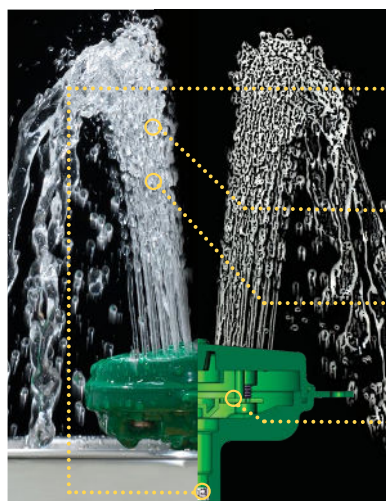

In eyewashes with two nozzles, often both streams are not consistent (too strong or too weak), causing challenges to rinse both eyes simultaneously. With a centrally located AXION eyewash head, both eyes are reliably flushed simultaneously

• LACK OF SIMULTANEOUS OPERATION OF EYEWASH AND BODY SHOWER

AXION Technology prevents the eyewash from starving when the body shower is activated, ensuring a compliant and comfortable operation of the combination emergency shower.

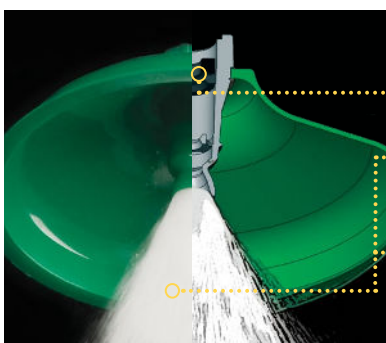

• LACK OF CONTROLLED, NON-INJURIOUS FLOW

An excessively strong water jet from the eyewash can increase eye injuries. AXION eyewashes consistently deliver a soft, non-injurious water stream with an even, predictable, and compliant stream height to prioritize overall user comfort.

AXION EYEWASH

- Integral flow control for compliant flow, velocity, and predictable stream height
- Smooth laminar flows provide comfortable water pressure
- Inverted water streams protect sensitive eye ducts and glands by flushing away from the tear ducts
- In-line strainer collects debris to help reduce injury aggravation

AXION SHOWERHEAD

- Integral flow control to regulate flow rate
- Compliant for velocity, flow pattern, and liters per minute requirements
- Minimized pressure for even water distribution across shower footprint

ICON LEGEND FOR SAFETY SHOWERS AND EYEWASHES

	Compliant to EN 15154 Meeting the European Standard		Compliant to ANSI/ISEA Z358.1-2014 Meeting the American Standard		Stainless-steel Highest resistance to corrosion and best hygienic properties
	Green Powder Coated Protection against corrosion, sunlight, impact and scratch		ATEX rated For safe operation In hazardous environments		Barrier-free Easily accessible to all individuals
	Freeze Protection for Outdoor Installation For safe operation in cold conditions		Thermal Protected For safe operation in hot conditions		Ceiling-mounted Safety Shower is mounted on the ceiling

TOP COMBINATION SAFETY SHOWERS

Best-Sellers out of 27 Combination Shower Models

- With AXION Technology, ensuring a consistent water flow for providing proper first aid
- Robust and durable construction for reliable performance
- Numerous options and accessories

8320 AXION	8330 AXION	8317CTFP AXION
Entry-level Combination Shower with ABS plastic bowl and showerhead	All-stainless steel Combination Shower for corrosive environments	Freeze protected, cable heated Combination Shower for cold environments
 <div> EN 15154 ANSI Z358.1 </div> <div> OPTIONS    </div> <p>Product Code: 10004820</p>	 <div> EN 15154 ANSI Z358.1  </div> <p>Product Code: 10004884</p>	 <div> EN 15154 ANSI Z358.1 </div> <div> OPTIONS   </div> <p>Product Code: 10004782</p>

TOP EYEWASH STATIONS

Best-Sellers out of 19 Eyewash Station Models

- With AXION Technology, ensuring a consistent water flow for reliably rinsing both eyes
- Rugged and durable design for reliable performance
- Numerous options and accessories

7260B AXION	7460B AXION	7461 AXION
Universal Eyewash Station with ABS plastic bowl for wall mounting (also available without bracket or with trap)	Wall-mounted Eyewash station with robust stainless-steel bowl (also available without bracket or with trap)	Pedestal mounted universal Eyewash Station with robust stainless-steel bowl
 <div> EN 15154 ANSI Z358.1 </div> <p>Product Code: 10004428</p>	 <div> EN 15154 ANSI Z358.1 </div> <div> OPTIONS    </div> <p>Product Code: 10004477</p>	 <div> EN 15154 ANSI Z358.1 </div> <div> OPTIONS    </div> <p>Product Code: 10004486</p>

TOP PORTABLE EMERGENCY EQUIPMENT

Best-Sellers out of 6 Portable Eyewash or Body Shower Models

- Compliant with international standards and meet safety regulations and guidelines
- Easily movable to different locations, providing emergency rinsing wherever needed
- For temporarily workspaces or areas where permanent water supply is impractical or unavailable

7500	7603	8140
Portable, gravity-fed Eyewash with a 60-liter tank capacity for wall or shelf mounting	Mobile, air-pressure operated Eyewash with 56-liter stainless-steel tank	Portable emergency Body Shower with 9 liters capacity
<div></div> <div>ANSI Z358.1</div> <div>OPTION</div> <div>Product Code: 10004492</div>	<div></div> <div>ANSI Z358.1</div> <div>OPTION</div> <div>Product Code: 10008093</div>	<div></div> <div>EN 15154</div> <div>Product Code: 10008119</div>

TOP EMERGENCY EQUIPMENT FOR LABORATORIES

Best-Sellers out of 28 Eyewash or Safety Shower for Laboratories Models

- With AXION Technology, ensuring a consistent water flow for reliably rinsing eyes and body
- Eyewash stations and safety showers meeting the special requirements for laboratories
- Numerous options and accessories

8122H AXION	7620 AXION EYEPOD	8901B AXION
Entry-level wall-mounted Drench Shower with ABS plastic shower head	Faucet mounted eyewash for laboratories, healthcare offices, schools, and even households	Versatile wall-mounted Eyewash Station with reinforced hose
<div></div> <div>EN 15154</div> <div>ANSI Z358.1</div> <div>OPTIONS</div> <div>Product Code: 10004634</div>	<div></div> <div>ANSI Z358.1</div> <div>SS+</div> <div>Product Code: 10004541</div>	<div></div> <div>EN 15154</div> <div>ANSI Z358.1</div> <div>Product Code: 10005156</div>

DISCOVER HAWS®

LEADING MANUFACTURER OF EMERGENCY EQUIPMENT AND SAFETY SOLUTIONS

For decades, *Haws*, based in Nevada, USA, has been a leader in emergency response and hydration equipment. As a top manufacturer of emergency showers and eyewash stations, *Haws* delivers dependable solutions for HSE professionals in every industry. Known worldwide for their reliability and efficiency, *Haws* products provide optimal protection in critical situations.

- **LOCAL PARTNER FOR SAFETY AND QUALITY**

Haws EMEA, a subsidiary of *Haws* Corp, is headquartered in Switzerland. With branches in Germany and the UAE, and a network of distribution partners, *Haws* EMEA caters to customers across Europe, the Middle East, and Africa. Our local production and development capabilities enable us to meet the specific needs of various industries, including oil & gas, chemical, mining, semiconductor, pharma, paper and pulp, waste treatment, and medical sectors in these regions.

- **COMPREHENSIVE PRODUCT RANGE**

The all-inclusive product range includes emergency showers, eyewash stations, and tepid water solutions for diverse industrial environments. Featuring our ground-breaking and patented *AXION* Technology, we combine efficiency and reliability to deliver proper first aid with unmatched features and benefits.

- **HIGH QUALITY STANDARDS**

Every product that leaves the *Haws* EMEA plant is built for durability and for years of service. Products comply with international safety standards EN 15154 and ANSI Z358.1, backed by extensive research and development. Processes are certified to ISO 9001, ISO 14001, and ISO 45001, ensuring all products are safe, reliable, and environmentally friendly.

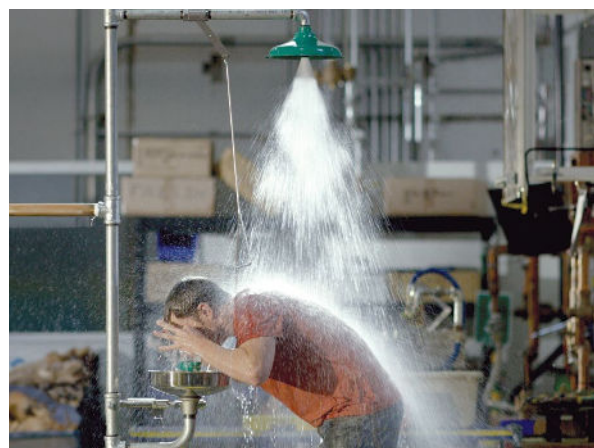

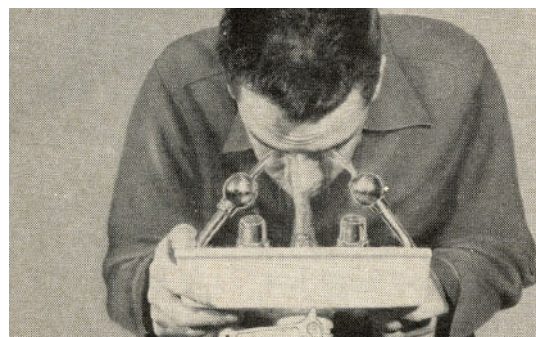

For HSE professionals, choosing the right safety equipment is crucial. *Haws* EMEA helps you to achieve safety goals and protect employee health. Discover our key products in this brochure and contact *Haws* EMEA or our distribution partners for information on our complete product range or any additional needs.
