

## FEATURES & BENEFITS

### SELF-CONTAINED SAFETY

Provides compliant eyewash protection without the need for a plumbed water supply. Perfect for temporary or remote worksites.

### RELIABLE 15-MINUTE FLUSHING

Delivers a continuous, soft water flow for the ANSI-required 15 minutes, helping to reduce injury in case of eye exposure to hazardous substances.

### DURABLE STAINLESS STEEL TANK

The 57-liter tank is made of corrosion-resistant stainless steel, providing long service life even in harsh environments.

### SAFE AND EASY PRESSURIZATION

Equipped with a pressure gauge, safety relief valve, and tire-type air valve for controlled and secure pressurization.

### FAST, INTUITIVE ACTIVATION

Large stainless steel push handle allows quick hands-free activation in an emergency. ABS eyewash heads include dust covers and built-in flow control.

## OPTIONS

- Emergency Body Spray Kit: Model 8901B AXION with hose is designed to provide targeted rinsing of the eyes, face, and body, increasing the flexibility of the safety shower system. Ideal for treating low-level chemical splashes or situations where full-body drenching may not be practical. Item number: 10005156
- Transport Cart: Model 9008 cart designed for the safe and easy transport of Haws stainless steel portable eyewash units, including Model 7603. The robust cart construction improves mobility on-site and simplifies relocation of the pressurized eyewash units. Item number 10005209
- Water Additive: Model 9082 is a bacteriostatic preservative specially formulated for use in portable eyewash units. A single 236 ml bottle treats 18.9 to 75.7 liter of potable water, helping to maintain water cleanliness and safety for up to four months. Ideal for ensuring compliance and reducing maintenance in self-contained emergency systems. 4 bottles per carton. Item number: 10000208

## SPECIFICATIONS

**Technical Information Portable Eyewash 7603** (item number: 10004486)

- Flow rate eyewash: 1.5 liter/minute
- Dimensions (H x W x D): 1000 x 404 x 404 mm
- Tank capacity: 57 liter
- Flushing time: > 15 minutes

### Product Highlights Portable Eyewash 7603

- Freestanding design enables easy installation near hazard zones
- 57-liter stainless steel tank for up to 15 minutes of continuous flow
- ABS eyewash heads with dust covers and flow control
- Reliable chrome-plated brass stay-open ball valve with stainless steel ball and stem
- Integrated pressure gauge and safety relief valve for safe operation
- Certified to ANSI Z358.1 by CSA

## APPLICATIONS

The Haws® Model 7603 is a mobile, pressurized emergency eyewash unit designed for use in areas where no plumbed water supply is available. With its 57-liter stainless steel tank and self-contained operation, it is the ideal solution for construction sites, maintenance shutdowns, remote work zones, and industrial areas under renovation.

This portable eyewash meets ANSI Z358.1 requirements and reliably provides a 15-minute flush for the eyes. Its robust design includes a pressure gauge, safety relief valve, and tire-type air valve for safe and easy pressurization. The unit is activated via a large stainless steel push handle and delivers a soft, aerated water flow through ABS eyewash heads with dust covers.
