

FEATURES & BENEFITS

HIGHEST CORROSION RESISTANCE

All components are made of stainless steel, ensuring long-lasting performance in corrosive environments such as chemical plants, marine facilities, offshore platforms, and hygiene-sensitive industries like pharmaceuticals and food processing.

UNIQUE AXION TECHNOLOGY

The patented AXION® Technology reliably delivers a compliant water jet for rinsing simultaneously body, eyes, and face. The unique AXION Technology eliminates the main issues of other safety shower systems to provide proper first aid.

ENHANCED EMPLOYEE SAFETY

The freestanding design enables easy installation near hazard zones, minimizing emergency response times and maximizing employee protection. Flexible top or bottom water supply options make it a versatile solution for any workspace.

HIGH VISIBILITY

Eye-catching stripes in safety green and bright yellow colors ensure clear visibility of the safety shower, even from a distance or in hectic situations

COMPLIANCE WITH SAFETY STANDARDS

The safety shower meets EN 15154 and ANSI Z358.1 standards, making it suitable for workplaces around the world and ensuring compliance with safety regulations.

OPTIONS

- Dust Cover: Model 9102 is a stainless-steel cover assembly that protects both the eyewash head and the bowl from contaminants and potential damage. Item number: 10005242
- Foot Treadle: Model SP220SS is a stainless-steel foot treadle assembly that enables hands-free activation of the eyewash. Item number: 10006153
- Instantaneous Water Heater: Model 9327CE is a CE-compliant electric water heater with a stainless steel cabinet, designed for indoor or outdoor use. It provides immediate tepid water for safety showers and eyewashes in accordance with EN and ANSI guidelines.
- Alarm System Model 9001.230V.DPDT: The alarm system includes a signal horn and flashing light to alert nearby personnel when the safety shower is activated. The unit can also transmit electrical signals to external control systems. Item number 10009288
- Privacy Curtain: Model 9037 enhances victim privacy during use and improves shower visibility. Item number 10005221

SPECIFICATIONS

Technical information All Stainless-Steel Safety Shower 8330 AXION (item number: 10004884)

- Flow rate drench shower: 76 liters/minute
- Flow rate eyewash: 14 liters/minute
- Dimensions (H x W x D): 2410 x 368 x 872 mm
- Water inlet: Rp 1-1/4" (EN 10226-1)
- Water outlet: Rp 1-1/4" (EN 10226-1)

Product Highlights Safety Shower 8330 AXION

- Fully stainless steel safety shower for maximum corrosion resistance
- Increased safety due to AXION Technology and integral flow control
- In-line mesh strainer prevents debris from entering the eyewash head
- Freestanding design enables easy installation near hazard zones
- Flexible top or bottom water supply options
- Eye-catching stripes in safety green and bright yellow colors ensure clear visibility of the safety shower
- Wide range of options for adapting to on-site requirements

APPLICATIONS

The Haws® 8330 AXION is a premium combination safety shower constructed entirely from corrosion-resistant stainless steel, making it ideal for use in highly corrosive or hygiene-sensitive environments. Engineered for maximum durability, it ensures long-term reliability in areas exposed to aggressive chemicals, salt-laden air, or other harsh industrial conditions.

Suitable for indoor and outdoor (non-freezing) use, the 8330 AXION is particularly recommended for chemical processing plants, marine and offshore facilities, pharmaceutical production, and food and beverage industries. Its all-stainless construction provides superior corrosion resistance, easy cleaning, and mechanical stability – even in the most demanding environments.
