

FEATURES & BENEFITS

UNIQUE AXION EYEWASH HEAD

The patented AXION® eyewash head reliably delivers a compliant water jet for rinsing simultaneously eyes and face. The unique, centered AXION water jet eliminates the main issues of other eyewash systems to provide proper first aid.

LEAK-FREE QUALITY

The eyewash unit and valve assembly are pre-built and fully water- and pressure-tested to ensure leak-free performance and proper functionality. This reduces installation time and ensures reliable operation from day one.

RELIABLE VALVE

The chrome-plated brass valve is designed to activate water flow with the push of a stainless-steel flag. The valve itself is equipped with a stainless-steel ball and stem, providing increased resistance to corrosion and mechanical wear.

COMPLIANCE WITH SAFETY STANDARDS

The safety shower meets EN 15154 and ANSI Z358.1 standards, making it suitable for workplaces around the world and ensuring compliance with safety regulations.

COST-EFFECTIVE SAFETY SOLUTION

The eyewash and showerhead, made from ABS plastic, offer durability and reliability at an attractive price point. ABS plastic is impact-resistant, strong, and highly resistant to many alkalis and diluted acids, ensuring long-term functionality without increasing costs.

OPTIONS

- Dust Cover: Model 9102 is a stainless-steel cover assembly that protects both the eyewash head and the bowl from contaminants and potential damage. Item number: 10005242
- Foot Treadle: Model SP220W is a foot treadle assembly that enables hands-free activation of the eyewash. Item number: 10006156
- Instantaneous Water Heater: Designed for indoor or outdoor applications, our CE-compliant electric water heaters deliver immediate tepid water for emergency showers and eyewashes. In line with EN 15154 and ANSI Z358.1, they ensure a continuous 15-minute flushing cycle with water maintained between 20 °C and 25 °C. This supports norm-compliant performance and helps prevent hypothermia during emergency response.
- Thermostatic Mixing Valve: Model 9201EW is a thermostatic mixing valve that blends hot and cold water to provide a safe, tepid water supply for a single emergency eyewash station, with a flow rate of up to 38.8 liter/minute (10 gpm). Item number: 10005253

SPECIFICATIONS

Technical information wall-mounted Eyewash 7260B AXION (item number: 10004428)

- Flow rate eyewash: 14 liter/minute
- Dimensions (H x W x D): 365 x 380 x 359
- Water inlet: Rp 1/2" (EN 10226-1)
- Water outlet: 1-1/4" O.D. Tailpiece

Product Highlights Eyewash 7260B AXION

- Bestselling eyewash station
- Increased safety due to AXION eyewash head and integral flow control
- Pre-built and fully water/pressure tested
- 28 cm durable bowl made of green ABS plastic
- Hot-dipped galvanized steel pipe and fittings
- Including universal safety sign
- Alkalis resistant 28 cm green ABS plastic bowl
- Reliable chrome-plated brass stay-open ball valve with stainless steel ball and stem
- Wide range of options for adapting to on-site requirements

APPLICATIONS

The Haws® 7260B AXION is a cost-effective, wall-mounted eyewash unit designed for general industrial applications where reliable emergency eye and face rinsing is required. The eyewash is equipped with the patented AXION® technology, delivering a soft, aerated water flow that gently rinses eyes and face simultaneously. The unique AXION system is designed to eliminate the shortcomings of conventional designs and deliver effective first aid in line with EN 15154 and ANSI Z358.1.

Typical applications include manufacturing facilities, maintenance areas, utility rooms, logistics centers, laboratories, and workshops. Its compact design, combined with wall-mounted installation, makes the 7260B AXION a smart choice for cost-conscious environments without compromising safety.
