

FEATURES & BENEFITS

COMPACT AND EASY TO RELOCATE

The 34-liter tank allows secure wall or bracket mounting close to hazard zones or on service vehicles.

RELIABLE 15-MINUTE FLUSHING

Provides a consistent, gravity-fed water flow for the required 15-minute rinse, helping reduce injury from chemical or particulate exposure.

TOOL-FREE MAINTENANCE

The tank has a wide fill opening with a secure cap for easy refilling and cleaning. Compact size and integral handles support simple handling and installation.

SAFETY-COMPLIANT DESIGN

Delivers ANSI-compliant eye rinsing without the need for a plumbed water connection. Ideal for mobile work teams and for temporary or remote sites.

OPTIONS

- Heat Shield: Model 9126 protects the tank water from overheating in hot environments. Reflects solar radiation and slows down heat absorption. Item number: 10010542
- Clear Dust Cover: Model 9128 covers the entire eyewash and helps keep it clean and ready for use, especially in environments with high levels of dust or general contamination. Item number: 10010543
- Water Additive: Model 9082 is a bacteriostatic preservative specially formulated for use in portable eyewash units. A single 236 ml bottle treats 18.9 to 75.7 liter of potable water, helping to maintain water cleanliness and safety for up to four months. Ideal for ensuring compliance and reducing maintenance in self-contained emergency systems. 4 bottles per carton. Item number: 10000208
- Cleansing stick: Model 9083 is a long-lasting cleansing stick designed for use in portable eyewash units. It helps prevent bacterial growth — including Legionella and E. coli — as well as algae and fungi, without the use of chemicals or power. One stick keeps water clean for up to three years, offering a low-maintenance, eco-friendly solution for safe eyewash operation. Item number: 10008912

SPECIFICATIONS

Technical information Compact Portable Eyewash 7501 (Item number: 10004495)

- Flow rate eyewash: 1.5 liter/minute
- Minimum Flushing time: 15 minutes
- 34 l high-density green polyethylene tank
- Dimensions (H x W x D): 368 x 559 x 257 mm
- Meets the ANSI Z358.1 Standard for Emergency Eyewash and Shower Equipment

Highlights Compact Portable Eyewash 7501

- Compact, gravity-fed eyewash for wall or bracket mounting
- Ideal for mobile work teams conducting inspections, maintenance, and field operations
- 34-liter tank provides a minimum of 15 minutes of continuous flow
- Suitable for installation on service vehicles and in confined or temporary work areas
- Provides reliable safety where fixed plumbing is unavailable
- Easy activation via pull-down yellow spray arm
- Wide-fill cap for quick inspection, cleaning, and refilling

APPLICATIONS

The Haws® 7501 is a compact, gravity-fed eyewash station designed for wall-mounted installation where fixed plumbing is unavailable or impractical.

This portable unit is ideal for mobile work teams conducting inspections and maintenance, as well as for use in confined or space-restricted areas. It provides reliable emergency rinsing for temporary or remote applications, including service vehicles, maintenance zones, storage rooms, and temporary workstations.

Wherever fixed plumbing is not an option, the 7501 delivers dependable first aid to support ANSI Z358.1 compliance and maintain workplace safety standards.
