

FEATURES & BENEFITS

FLEXIBLE USAGE

Can be easily carried to construction sites or used for maintenance purposes. Its compact design makes it suitable for service vehicles with limited space. Additionally, it includes a wall bracket for secure storage.

ROBUST CONSTRUCTION

Constructed with a sturdy pressure cylinder in a highly visible signal green color, compliant with the AFNOR NFX08003 standard. The ergonomic plastic handle with a stopper enhances durability.

INTUITIVE OPERATION AND ERGONOMIC DESIGN

Featuring a flexible shower hose that simplifies the rinsing of all body parts in cases of chemical or thermal burns. Light weight makes it easy to carry the emergency body shower.

RELIABLE SAFETY SOLUTION

Pressure is generated through an integrated CO₂ cartridge. An antibacterial additive is included to ensure the water's durability for up to 12 months.

COMPLIANCE WITH SAFETY STANDARDS

The body shower complies with EN 15154-3, making it suitable for workplaces across Europe and many other regions, and ensuring compliance with international safety regulations.

OPTIONS

- Water additive 9086 ensures durability of the water for a period of up to 12 months.
- CO₂ Cartridge 9060 which should be replaced after each use or annually.
- Wall box 9206 for secure mounting and protection of the 8140 unit.

SPECIFICATIONS

Technical Information Portable emergency body shower 8140 (item number: 10008119)

- Capacity: 9 liter
- Dimensions (H x W x D): 740 x 180 x 180 mm
- Weight (empty): 5 kg
- Weight (full): 14 kg
- Application temperature: +15 bis +25 °C.
8140 is not suitable for freezing conditions.

Product Highlights Portable emergency body shower 8140

- Easily portable for use on construction sites or during maintenance operations
- Compact design, making it suitable for service vehicles with limited space
- Sturdy pressure cylinder in a highly visible signal green (compliant with AFNOR NFX08003 standard).
- Flexible shower hose facilitates thorough rinsing of all body parts in cases of chemical or thermal burns.
- Intuitive operation and ergonomic design
- Pressure is generated by an integrated CO₂ cartridge
- Antibacterial additive included to ensure the water remains durable for up to 12 months
- EN 15154-3 and CE0069 compliant

APPLICATIONS

The Haws® portable emergency body shower Model 8140 is the ideal solution when a plumbed-in safety shower is not available – for example on construction sites, during maintenance work, or in service vehicles. The unit includes water additive 9086, CO₂ cartridge 9060, and a wall bracket for secure storage.

Model 8140 is highly portable and provides immediate first aid in cases of chemical skin contamination or thermal burns. It is not suitable for use in case of eye injuries.
