OPTIONS

- No options available

For more information, visit www.haws.ch or call + 41(0)34 420 60 00.

SPECIFICATIONS

The cart allows mobile teams to easily move the eyewash unit* to hazardous worksites and ensures rapid emergency response anywhere. The integrated tank collects water during activation or testing, simplifying cleanup and reducing slip hazards.

Constructed from powder-coated steel tubing, the cart features four smooth-rolling casters (two lockable) for easy relocation and stable positioning.

* not included

APPLICATIONS

Model 9007, the Cart with Tank for Portable Eyewashes, ensures that reliable emergency response is always within reach in:

- Construction sites without permanent plumbing
- Maintenance and repair operations across large industrial facilities
- Temporary work zones in oil and gas, chemical processing, or refinery environments
- Outdoor workspaces with shifting operations or exposure risks
- Loading docks and storage zones where work areas frequently change
- Emergency drills and safety training exercises
- Plant shutdowns, turnarounds, and temporary setups
