

FEATURES & BENEFITS

LONG-LASTING AND LOW MAINTENANCE

The UV-resistant green powder coating enhances visibility while protecting against corrosion, impacts, and scratches. This results in a long service life and reduced maintenance costs, contributing to a lower total cost of ownership.

UNIQUE AXION TECHNOLOGY

The patented AXION[®] Technology reliably delivers a compliant water jet for rinsing simultaneously body, eyes, and face. The unique AXION Technology eliminates the main issues of other safety shower systems to provide proper first aid.

CORROSION-RESISTANT BOWL

The 28 cm round eyewash bowl, made of 1.4301 (AISI 304) stainless steel, is resistant to alkaline substances, salt solutions, most acids, and UV exposure.

SAFE DEPLOYMENT

The chrome-plated brass water filter with 50 x 50 mesh prevents dirt from entering the eyewash, ensuring that the device always functions optimally. The filter is easy to maintain.

LEAK-FREE QUALITY

The eyewash unit and valve assembly are pre-built and fully water- and pressure-tested to ensure leak-free performance and proper functionality. This reduces installation time and ensures reliable operation from day one.

COMPLIANCE WITH SAFETY STANDARDS

The eyewash meets EN 15154 and ANSI Z358.1 standards, making it suitable for workplaces around the world and ensuring compliance with safety regulations.

OPTIONS

- Dust Cover: Model 9102 is a stainless-steel cover assembly that protects both the eyewash head and the bowl from contaminants and potential damage. Item number: 10005242
- Foot Treadle: Model SP220 is a foot treadle assembly that enables hands-free activation of the eyewash. Item number: 10003587
- Instantaneous Water Heater: Designed for indoor or outdoor applications, our CE-compliant electric water heaters deliver immediate tepid water for emergency showers and eyewashes. In line with EN 15154 and ANSI Z358.1, they ensure a continuous 15-minute flushing cycle with water maintained between 20 °C and 25 °C. This supports norm-compliant performance and helps prevent hypothermia during emergency response.
- Emergency Body Spray Kit: Model 8901RFK AXION with hose is designed to provide targeted rinsing of the eyes, face, and body, increasing the flexibility of the safety shower system. Ideal for treating low-level chemical splashes or situations where full-body drenching may not be practical. Item number: 10005164

SPECIFICATIONS

Technical data – Eyewash 7461 AXION green PC with green powder coated

- Flow rate: 14 liters/minute
- Dimensions (H x W x D): 954 x 369 x 286 mm
- Water inlet: BSP – Rp 1/2" (EN 10226-1)
- Water outlet: BSP – Rp 1-1/4" (EN 10226-1)

Key features

- Green powder coated – increases resistance to environmental influences and mechanical load
- Pre-assembled and fully water and pressure tested
- AXION technology with integrated flow control for a standard-compliant water jet
- Corrosion-resistant, 28 cm stainless steel bowl
- Reliable chrome-plated brass ball valve with stainless steel ball and stem
- Chrome-plated brass strainer prevents suspended particles in the water from entering the eyes
- Includes universal safety sign
- Complies with standards [EN 15154](http://www.haws.ch) and ANSI Z358.1
- Wide range of options for adaptation to local requirements

APPLICATIONS

The pedestal **eyewash 7461 AXION green PC** is the ideal solution for industrial applications that require flexible placement and additional protection. Thanks to its **green powder coated finish**, it offers increased resistance to environmental influences and mechanical load.

It is particularly suitable for the chemical and pharmaceutical industries, petrochemicals, water treatment plants, and all industrial applications that require high corrosion resistance. The stainless steel collection basin ensures high corrosion resistance and exceptional durability.
