

FEATURES & BENEFITS

LONG-LASTING AND LOW MAINTENANCE

The UV-resistant green powder coating enhances visibility while protecting against corrosion, impacts, and scratches. This results in a long service life and reduced maintenance costs, contributing to a lower total cost of ownership.

UNIQUE AXION TECHNOLOGY

The patented AXION® Technology reliably delivers a compliant water jet for rinsing simultaneously body, eyes, and face. The unique AXION Technology eliminates the main issues of other safety shower systems to provide proper first aid.

LEAK-FREE QUALITY

The eyewash unit and valve assembly are pre-built and fully water- and pressure-tested to ensure leak-free performance and proper functionality. This reduces installation time and ensures reliable operation from day one.

HIGH VISIBILITY

Eye-catching stripes in safety green and bright yellow colors ensure clear visibility of the safety shower, even from a distance or in hectic situations

COMPLIANCE WITH SAFETY STANDARDS

The safety shower meets EN 15154 and ANSI Z358.1 standards, making it suitable for workplaces around the world and ensuring compliance with safety regulations.

OPTIONS

- Dust Cover: Model 9102 is a stainless-steel cover assembly that protects both the eyewash head and the bowl from contaminants and potential damage. Item number: 10005242
- Foot Treadle: Model SP220 is a foot treadle assembly that enables hands-free activation of the eyewash. Item number: 10003587
- Instantaneous Water Heater: Designed for indoor or outdoor applications, our CE-compliant electric water heaters deliver immediate tepid water for emergency showers and eyewashes. In line with EN 15154 and ANSI Z358.1, they ensure a continuous 15-minute flushing cycle with water maintained between 20 °C and 25 °C. This supports norm-compliant performance and helps prevent hypothermia during emergency response.

SPECIFICATIONS

Technical data – 7261 AXION green PC eyewash with green powder coating

- Flow rate: 14 liter/minute
- Dimensions (H x W x D): 935 x 369 x 281 mm
- Water inlet: BSP – Rp 1/2" (EN 10226-1)
- Water outlet: BSP – Rp 1-1/4" (EN 10226-1)

Important features

- Green powder coated – increases resistance to environmental influences and mechanical loads
- AXION technology with integrated flow control for a standard-compliant water jet
- Pre-assembled and fully water and pressure tested
- Robust, 28 cm bowl made of high-quality ABS plastic
- Reliable chrome-plated brass ball valve with stainless steel ball and stem
- Effective brass strainer – prevents suspended particles from entering the eye
- Includes universal safety sign
- Complies with EN 15154 and ANSI Z358.1 standards
- Wide range of customization options for specific requirements

APPLICATIONS

The pedestal-mounted **7261 AXION green PC** eyewash is the ideal solution for laboratories and industrial applications where flexible placement and additional protection are required. Thanks to its **green powder coating**, it offers increased resistance to environmental influences and mechanical loads.

It is particularly suitable for mechanical engineering, tool manufacturing, warehouses and logistics centers, the paper industry, schools, wastewater treatment plants, and waste incineration plants – anywhere where a robust, durable, and clearly visible eyewash is required.
