

OVERHEAD TANK SHOWER

WHERE SAFETY
MEETS SELF-
CONTAINMENT.

The proven solution for safety in
remote and desolate environments

 **Haws**[®]

SAFETY INNOVATORS THROUGH GENERATIONS OF THE HAWS® FAMILY

Since 1906, Haws® has been an industry-leading designer and manufacturer of quality, innovative products. A family-owned company, *Haws* has more than 70 years of experience in emergency equipment, safety showers, and tepid water systems. Haws is best known for its portfolio of solutions in the oil and gas and petrochemical industries, just to name a few.

Haws safety solutions have been providing facilities with increased assurance of compliance and employee safety for decades.

Headquartered in northern Nevada/U.S.A., *Haws* expanded its operations to Switzerland in 1984 to serve customers in Europe, the Middle East and Africa. *Haws* continues to expand its global footprint through the innovative spirit of the third, fourth, and fifth generations of the *Haws* family.

OVERHEAD TANK SHOWER 4000

The *Haws* OTS 4000 Overhead Tank Shower provides safety in remote and desolate environments, and under extreme climatic conditions.

The integrated tank ensures that the safety shower and eyewash achieve the required flushing time of 15 minutes, even without a water connection. The OTS 4000 is a complete solution and can also be used where no reliable water supply or sufficient water pressure or flow rates are available.

FEATURES:

- Meets ANSI Z358.1 and EN15154-5 international standards
- Solid construction and high-quality components
- Engineered, customized and built in Switzerland
- Many product options to meet your site's specific regulations

With optional water chiller and immersion heater, the OTS 4000 can be used in environments of -5°C to + 60°C. Hundreds of customers worldwide trust the *Haws* OTS 4000 Overhead Tank Shower.

GLOBAL FACILITIES

SUN SHIELD
Protects the tank from brightening due to the solar radiation

ALARMS
Audio and visual alarms notify the immediate area of an emergency

EXCELLENT VISIBILITY
Eye-catching color and graphics for high visibility

TEMPERATURE DISPLAY
Displays tank water temperature

WATER TANK
The gravity-fed, glass-reinforced, insulated plastic tank (1600 l) provides tepid water for a 15-minute flush

INSIDE LIGHT
Provides safe lighting for shower

SOLID FRAME
Galvanized stainless steel provides superior defense in highly-corrosive environments

WATER LEVEL INDICATOR
Indicates water level in tank

OVERFLOW DRAIN EXIT
Prevents tank overflow

WATER CONNECTION
Provides a permanent or temporary connection to the water supply

LEVEL SWITCH
Dry-running protection for the immersion heater in explosion risk zones

IMMERSION HEATER
Prevents the water from falling below a defined temperature

JUNCTION BOX
Ex or non-Ex switch box for all electrical components

WATER CHILLER
Ex or non-Ex chiller prevents water from reaching dangerously high temperatures

DRENCH SHOWER & EYEWASH
Consistent hydrodynamic flow provides comfortable water pressure for a full 15-minute flush
